

SYSTEM AND METHOD FOR COMMUNICATING A MESSAGE IN A MAILING SYSTEM

Abstract of the Invention

The present invention is directed to a system and method for providing confirmation and messaging relating to the distribution of a mail piece within a mailing system. Information including a mailer's address is included in a digital post mark or printed directly on the mail piece. During delivery of the mail piece, the information is read, and the mailer's address is captured. A message, which may include a mail piece image, a recipient response and physical image of a recipient, is sent to the mailer in accordance with read information.
